**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-34 are rejected under 35 U.S.C. 102(b) as being anticipated by Khosla (6,080,063).

Regarding claim 1, Khosla shows a plurality of data gathering steps, which meet the data receiving steps as claimed, and a remote computer system for simulating a live event based on the gathered data (col. 7, lines 61-67), which meets the generating step as claimed.

Regarding claim 2, see col. 7, lines 15-18.

Regarding claims 3 and 4, Khosla shows a simulated driver's view from a racecar based on the gathered position information in a live event (col. 7, lines 46-68), which meets the synthetic camera and field of view as claimed since the simulated driver's view is the same as the real camera field of view generated by the driver's helmet camera (col. 4, lines 19-21).

Regarding claim 5, see col. 7, lines 46-68.

Regarding claim 6, see col. 7, lines 26-37, or 61-68.

Regarding claim 7, see col. 6, lines 49-68.

Regarding claim 8, the field of view of the driver helmet mounted camera is being simulated as shown in Figure 6 (see col. 7, lines 46-68, and col. 4, lines 19-21).

Regarding claim 9, Khosla further teaches that the computer generated images of simulated participants are mixed with a live video feed from live event 100...by digitizing the video feed and overwriting it with computer generated images of the simulated participants (col. 7, lines 16-19), which meets the setting step and combining steps as claimed because synthetic scene is inherently generated and a synthetic field of view is inherently set in order to combine the synthetic scene with the real images or live video.

Regarding claims 10-19, Khosla discloses all the features of the instant invention as discussed above.

Regarding claims 20-34, in addition of above rejections, Khosla further shows a broadcast server (400), and a client device (140,142,144). Furthermore, the racecars as illustrated in Figure 6 meet the synthetic scene as claimed, and the racetrack or course meets the synthetic field of view as claimed. It should be noted that the racetrack could be either real video image or simulated three dimensional computer graphics as aforementioned. The broadcast server updates the client device with positional information frequently (col. 7, lines 4-14).

### ***Response to Arguments***

3. Applicant's arguments with respect to claims 1-34 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
